

Software Developer Backend (f/m) - For a fulfillment start-up

at Liquid Labs, in Hamburg

Description

We are searching for new team members for our dynamic, cross-functional and agile team. You work closely together with our product department, and make a contribution to the development of our fulfillment start-up odc. Candidates are expected to work independently, take responsibility, and be able to make decisions.

Liquid Labs is the company builder and innovation motor of the Otto Group – a worldwide-operating retail and services group. We operate independently of the group, but leverage the assets and reach that they have built. Our teams are filled with creative and entrepreneurial-minded people, who love getting things done and seeing results. They are given not only the financial backing of our corporate parent, but freedom and mentoring by our in-house team.

For the position of Software Developer Backend we seek entrepreneurial-minded people who help innovate as well as independently execute software initiatives.

You will:

- Work closely in a small team rapidly building platforms to support new startups
- Be required to solve problems creatively
- Be pair programming to share knowledge
- Be expected to help get the team moving faster and producing higher quality

Requirements

If you:

- Have 3+ years of programming skills in your language of choice
- Are experienced in a major server-side development stack
- Have profound knowledge of JavaScript and/or Java
- Experience with Test-Driven development and continuous delivery
- Are keen to take responsibility and great at getting things done
- Have already worked within an agile, international and interdisciplinary environment
- Speak fluent English and are a team player with good communication skills

then apply now for open positions starting at the earliest possible date!

Benefits

You will benefit from:

- The possibility to design and build a codebase right from the start
- Freedom in what you are doing – an independent work culture with flexible working hours and without hierarchy
- The ability to create your position within the team yourself and do what you love
- A qualified team with similar mindset – moving things forward, quickly and efficiently
- Experienced management on both the tech and business side functioning as in-house mentors
- Sufficient funding and corporate resources
- A modern work environment, a centrally located office in the middle of Hamburg, competitive salary and corporate benefits (e.g. subsidized public transport, gym membership discounts, 15% shopping discount for almost everything)
