

## Venture Developer

at Liquid Labs in Hamburg

### About Liquid Labs

We're a small group of former entrepreneurs, venture capitalists and technology enthusiasts building multiple businesses in an R&D lab surrounding. At Liquid Labs, we value diversity on an individual level. We're dedicated to creating an environment where people can be their authentic selves and share their own diverse backgrounds, experiences, perspectives and ideas. We remain a partner to the existing investment ecosystems while allowing entrepreneurial minded people to learn how to build startups. Our managing directors are both former VC's with many years of experience. They are on site and accessible to the teams. The opportunity to experience company building is what we offer without the risk of doing it alone. We accept that no matter how well executed products can be, sometimes they just don't work. This is a part of our approach to innovation and we recover as well as refocus quickly when things don't work out. As a company builder we belong to Otto Group Digital Solutions which builds digital B2B business models in the retail segment. We focus on the market while leveraging the Otto Group, one of the largest e-commerce retailers in Europe.

### About the job

Our Venture Developers help to define and set up the companies we build at Liquid Labs. As part of each company, you will drive several functions such as online marketing, product development, supply management, sales and operations. As a part of Liquid Labs you will remain on a project for 3-6 months. You then either move on to a new venture with different challenges and business models or stay with the initial project based upon your interests. You will gain a direct perspective into building startups, learn day-to-day management and build deep functional expertise. You will be part of an international team of motivated and talented people working towards one goal. Liquid Labs moves fast and will provide you with extensive opportunities for initiative, creativity as well as leadership. Our Venture Developers get the unique opportunity to learn, experience and join great teams for 3 to 6 months with the option to stick around and build the businesses they potentially fall in love with.

### Who we're looking for

You have earned an outstanding degree at a top university and have gained first work experience in a high-performance environment. Further, you have a proven track record of personal, academic and professional achievements. Beyond your managerial skills, you have strong building and analytical skills combined with a hands-on approach. You are very passionate about startups and have a deep interest in developing businesses. Independence, flexibility and speed are as important to you as gaining extensive experience. Finally, you are fluent in German and English (additional language skills are a plus) and keen to learn. A strong entrepreneurial drive and the ability to achieve goals in a fast paced environment round out your profile.

### Are you in?

Please send us your application either **in German or in English** to [raphael.ehret@ogds.de](mailto:raphael.ehret@ogds.de)
